Agricultural Statistics of India

1938-39

VOLUME I—BRITISH INDIA

Introductory Note

This annual volume is the fifty-fifth of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary table No. 1, for five years in the provincial tables and for two years in the district tables. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States* as far as they are reported. Owing to her political separation from India, Burma is excluded† from the scope of this volume.

The statistics are compiled from annual returns furnished by the Governments of Assam, Bengal, Bombay, the Central Provinces and Berar and the United Provinces; the Chief Commissioner, Coorg, the Commissioner, Ajmer-Merwara, the Directors of Agriculture, Bihar and Sind, the Deputy Commissioner, Delhi, the Director of Industries and Commerce, Madras, the Revenue and Divisional Commissioner, North-West Frontier Province, the Director of Development, Orissa and the Director of Land Records, Punjab.

The statistics are given in seven separate tables, namely, I—Area; II—Classification of area; III—Area under irrigation; IV—Area under crops; V—Live-stock, ploughs, and carts; VI—Land Revenue assessment; and VII—Harvest prices. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are three appendices, namely, Appendix A, dealing with the average yield per acre of principal crops; Appendix B, giving the meaning of vernacular terms used in the volume; and Appendix C, containing an alphabetical list of crops cultivated in India and their classification in Table IV.

The year to which the returns relate ends on 30th June, this being the generally recognised agricultural year, except in Assam where the year ends on 31st March and in the Central Provinces and Berar where it ends on 31st May. It should, however, be borne in mind that statistics relating to areas irrigated (Table III) and areas under crops and specification of crops (Table IV) generally include both the *kharif* (autumn) and the *rabi* (spring) crops, and therefore actually relate to the year ended with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to the Mysore State are shown separately.

† In Appendix A, however, figures relating to average yield of principal crops of Burma also are shown.

Total area and population of India

The total area of India (excluding Burma) is 1,573,000* square miles, or 1,006,545,000 acres with a population of 338 millions according to the census of 1931. This may be divided as follows :—

	Acres	Population
(1) British Provinces (including Indian States within the political jurisdiction of the Government of Assam)	520,555,000	257,060,000
(2) Indian States having direct political relations with the Crown Representative	436,748,000	78,441,000
(3) Certain specially administered territories in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	14,536,000	2,102,000
(4) British Baluchistan (including administered areas)	54,706,000	484,000
Total	1,006,545,000	338,067,000

No returns of agricultural statistics are prepared either for item (3), certain specially administered territories in the North-West Frontier Province, or for item (4), British Baluchistan.

Table I
Total area

The total area of the British Provinces (item 1 above) shown in this volume—520,555,000 acres or 813,000 square miles—includes 7,891,000 acres, with a population of 626 thousands, belonging to Indian States, which are within the political jurisdiction of the Government of Assam, viz., Manipur and the Khasi and Jaintia Hill States.

Deducting 7,891,000 acres belonging to Indian States in Assam from the total area of 520,555,000 acres included in British Provinces, the remainder, 512,664,000 acres, is shown in Table I, and this represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the southern provinces. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers", i.e., papers prepared by the village accountants for the purpose of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces and Berar, Madras, the Punjab, the North-West Frontier Province and Orissa differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the surveyed area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail-roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 511,877,000 acres, as against 512,664,000 acres according to professional survey.

Table II
Classification of area

	Acres (1,000)	Per cent	shown in the margin. Of the total area, 68,184,000 acres, or 13 per cent, are occupied by forests; and the area not available for cultivation, i.e., land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 91,811,000 acres, or 18 per cent; while other uncultivated land, excluding current fallows amounts to 94,180,000
Forests	68,184	13.3	
Not available for cultivation	91,811	17.9	
Other uncultivated land excluding current fallows†	94,180	18.4	
Current fallows	48,303	9.5	
Net area sown	209,400	40.9	
Total	511,877	100	

* The difference between this area and that shown in the Census report of 1931 is due to the adoption of revised areas from the annual returns of Agricultural Statistics where available.

† Replaces the former head "Culturable waste other than fallow". Out of the total area shown under this head, 9,867,000 acres are definitely known to be culturable, (vide column 11 of Summary Table No. 2 on page 4).

acres, or 18 per cent of the total area and land kept fallow in the year of report 48,302,000 acres, or about 10 per cent. The net area actually sown with crops during 1938-39 was therefore 209,400,000 acres, or 41 per cent of the total

	Proportion of sown to total area	Population per 100 acres of sown area
Bombay	69 per cent	68
United Provinces	53	134
Bengal	49	108
Delhi	47	369
Punjab	42	94
Bihar	41	180
Madras	39	139
Central Provinces and Berar	39	63
Orissa	32	124
North-West Frontier Province	24	118
Assam	19	130
Ajmer-Merwara	18	189
Sind	17	76
Coorg	16	110
British India	41	121

area, as against 213,494,000 acres in the preceding year. If, however, areas sown more than once during the year are taken as separate areas for each crop, the gross area sown in the year of report amounts to 243,584,000 acres, as against 246,864,000 acres in the preceding year. The proportion of the net sown to total area and the number of population per 100 acres of sown area in each province are stated in the

margin. The proportion of sown to total area in the year under review was highest in Bombay and lowest in Coorg and the population per unit of sown area was the largest in Delhi and smallest in Bombay.

The term "forests" in the returns of Agricultural Statistics means "any land classed or administered as forest under any legal enactment dealing with forests". Any cultivated area existing within such forests may, however, be excluded from that head and entered in the column "Net area sown". The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the Administration of the Forest Department for various reasons, the chief amongst which are (1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, local boards, municipalities, etc., and (3) certain village and other lands not covered by forests but worked by the Forest Department and returned as forest lands by that Department, are not treated as forests in the returns of agricultural statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (68,184,000 acres in 1938-39), 23 per cent lies in the Central Provinces and Berar, 19 per cent in Madras, 14 per cent in the United Provinces, 12 per cent in Bombay and 10 per cent in Bihar and the remaining 22 per cent in the other provinces.

Most of the barren and unculturable lands lies naturally in the hilly tracts of southern India and in the dry and desert regions of north-western India. Madras contains 16 per cent of the total area under the head "Not available for cultivation" (91,811,000 acres in 1938-39), Sind 15 per cent, the Punjab 14 per cent, the United Provinces 11 per cent, Bengal 10 per cent, Bihar and Orissa 7 per cent each, Bombay 6 per cent, the Central Provinces and Berar and Assam 5 per cent each and the remaining provinces 4 per cent.

The head "Other uncultivated land excluding current fallows"† represents all uncultivated land other than that included in the heads, "Forests", "Area not available for cultivation" and "Current fallows". It is not possible to specify accurately how much of the area included under this head may be regarded as really fit for cultivation; and the portion which is definitely known to be culturable has, therefore, been shown under a separate head (vide column 11 of Summary Table No. 2 on page 4 and also column 8 of Table II, Nos. 22-34, pp. 35-58). Areas under bamboos and thatching grass when not forming parts of forest areas, as also groves not classed in the sown area, are included under this head.* Of the total area under the head "Other uncultivated land excluding current fallows" (94,180,000 acres in 1938-39), 20 per cent was in Assam, 15 per cent each in the Punjab and the Central Provinces and Berar, 11 per cent each in Madras and the United Provinces, 7 per cent each in Bengal and Bihar, 6 per cent in Sind and the remaining 8 per cent in the other provinces.

* For detailed information in respect of provinces, see notes at the foot of Table II, Nos. 22-34 (pp. 35-58).

† Vide footnote † on the preceding page.

Current fallows The maximum period for which land left uncultivated is reckoned as fallow varies according to local laws and customs in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in Bombay. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "Other uncultivated land excluding current fallows". Owing to this diversity of practice, the classification of area as "other uncultivated land excluding current fallows" and "Current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in Bombay, but as "other uncultivated land" in the Punjab. The total area returned as "Current fallows" in 1938-39 was 48,302,000 acres, as against 45,436,000 acres in the preceding year.

Table III
Irrigation

The total area irrigated in 1938-39 was 53,662,000 acres, as against 52,833,000 acres in the preceding year. Of this area, 24,412,000 acres were irrigated from Government canals, 3,531,000 acres from private canals, 13,210,000 acres from wells, 5,873,000 acres from tanks, and 6,636,000 acres from other sources of irrigation. In India, irrigation is ordinarily resorted to on an extensive scale in tracts where the rainfall is most precarious. In Assam, eastern Bengal, and the Malabar Coast (including the Konkan), where the rainfall is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1938-39, the Punjab accounted for 31 per cent, the United Provinces 22 per cent, Madras 16 per cent, Bihar 9 per cent, Sind 8 per cent and the other provinces for the remaining 14 per cent. The proportion of irrigated to total area sown in each province is stated in the margin.

	Proportion of irrigated to total sown area per cent
Sind	85
Punjab	66
North-West Frontier Province	49
Delhi	49
Ajmer-Merwara	35
United Provinces	33
Bihar	28
Madras	27
Orissa	21
Assam	10
Bengal	8
Central Provinces and Berar	4
Bombay	4
Coorg	3

The above figures of irrigated areas do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas sown more than once as separate areas for each crop, the gross area of irrigated crops was 58,020,000 acres in 1938-39. Of this area, 83 per cent was under food crops and the remainder under non-food crops. Of the former, 18,316,000 acres were under rice, 12,877,000 acres under wheat, 2,778,000 acres under barley, 1,510,000 acres under jowar, 1,013,000 acres under bajra, 1,231,000 acres under maize, 1,798,000 acres under sugarcane, and the remaining 5,344,000 acres under other food crops. Of the irrigated non-food crop area, 4,227,000 acres were occupied by cotton. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of Table III (pages 60-106).

Table IV
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are framed on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountant. In the same province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains, and in this case the whole area of the mixed field is assigned to food-grains.

The gross area cultivated with crops covered, as stated before, 243,584,000 acres in 1938-39. The different classes of crops and the area occupied by each class are stated in the margin. Of the total sown area, food-crops occupied

	Acres (1,000)	Per cent of total
Food-grains	186,257	76.5
Condiments and spices	1,501	0.6
Sugar	3,154	1.3
Fruits and vegetables	3,005	1.6
Miscellaneous food-crops	1,354	0.5
Total food-crops	190,171	80.5
Oilseeds	16,187	6.6
Fibres	17,726	7.3
Dyes and Tanning materials	55	..
Drugs and narcotics	2,188	0.9
Fodder crops	10,371	4.3
Miscellaneous non-food crops	886	0.4
Total non-food crops	47,413	19.5

about 196,171,000 acres, or 81 per cent and non-food crops 47,413,000 acres, or 19 per cent. Of the food-crops, food-grains (cereals and pulses) covered as much as 186,257,000 acres†, or 77 per cent of the total area sown, and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops * together) some 9,914,000 acres, or 4 per cent of the total. Of non-food crops, fibres (such as cotton, jute, hemp, etc.) occupied 17,726,000 acres and oilseeds 16,187,000 acres‡, or 7 per cent of the total area sown in each case. The other non-food crops*—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied about 13,500,000 acres, or 5 per cent of the total.

The area under food-grains (186,257,000 acres) showed a decrease of 505,000 acres, as compared with the preceding year. The actual increase or decrease under each food-grain is stated in the marginal table. It will be seen that the decrease occurred mainly under

	1938-39	1937-38	Increase (+) or Decrease (—)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Rice	69,918	69,455	+463
Wheat	26,781	26,633	+148
Barley	6,200	6,311	—111
Jowar	20,833	20,762	+71
Rajma	12,776	12,498	+278
Moong	3,491	3,475	+16
Maize	5,722	5,633	+89
Gram	11,653	13,662	—1,979
Other grains and pulses	28,553	28,333	+220

gram in Bihar and the Punjab, and the remaining 10 per cent in the other provinces.

The total area under oilseeds (16,187,000 acres) showed a decrease of 798,000 acres, as compared with the preceding year. The decrease occurred mainly under groundnut. The actual increase or decrease under each kind of oilseeds is stated in the margin. Of the total area under oilseeds 35 per cent was in

	1938-39	1937-38	Increase (+) or Decrease (—)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Linseed	2,478	2,489	—11
Sesamum	2,421	2,438	—17
Rape and mustard	2,977	3,091	—114
Groundnut	5,690	6,408	—709
Coconut	650	657	—7
Castor	416	400	+16
Other oilseeds	1,537	1,692	—155

Madras, 15 per cent each in Bombay, and the Central Provinces and Berar, 9 per cent in Bihar, 7 per cent each in Bengal, and the United Provinces‡, 5 per cent in the Punjab and the remaining 7 per cent in other tracts.

* For a list of these crops, see Appendix C.

† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated at 4 million acres in the whole province in 1938-39. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1938-39 would come to 182 million acres instead of 186 million acres.

‡ The figures shown under the several heads of oilseeds in Table IV against the United Provinces represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food-crops. If the areas occupied by the scattered oilseeds plant were added up, it is estimated very roughly that they would amount in 1938-39 for the whole of the United Provinces to 4 million acres. Including this area, the total area under oilseeds in British India in 1938-39 would come to about 20 million acres.

Condiments and spices

The total area under condiments and spices in 1938-39 was 1,501,000 acres, as against 1,383,000 acres in the preceding year. Spices are grown mostly in southern India, Madras alone accounting for about 43 per cent of the total area under condiments and spices in 1938-39.

Sugar

The total area occupied by sugar-yielding plants in 1938-39 was 3,154,000 acres, as against 3,859,000 acres in the preceding year. Of this area, 2,990,000 acres were under sugarcane, as against 3,701,000 acres in the preceding year. Of the sugarcane area, 54 per cent was in the United Provinces, 13 per cent in Bihar, 12 per cent in the Punjab, 10 per cent in Bengal and 3 per cent in Madras. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 164,000 acres, which was slightly greater than in the preceding year. Of this area, Madras accounted for 59 per cent and Bengal 40 per cent.

Fibres

Fibre crops occupied 17,726,000 acres in 1938-39, as against 18,944,000 acres in the preceding year. The actual increase or decrease under the several kinds of fibres is shown in the marginal table. The area under cotton showed

	1938-39	1937-38	Increase (+) or Decrease (-)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Cotton	15,587	15,379	-1,472
Jute	3,125	2,817	+278
Other fibres	714	738	-21

a decrease of 10 per cent. Of the total cotton area, 27 per cent was in Bombay, 26 per cent in the Central Provinces and Berar, 21 per cent in the Punjab, 14 per cent in Madras, 6 per cent in Sind and

5 per cent in the United Provinces. The area under jute showed an increase of 10 per cent. Of the total jute area, 79 per cent was in Bengal and the remainder was practically confined to the adjoining provinces of Bihar, Orissa and Assam. Other fibres together showed a decrease of 3 per cent, as compared with the preceding year.

Dyes and tanning materials

The total area under dyes and tanning materials was 55,000 acres in 1938-39. Of this, the area under indigo, which is now mostly grown for green manuring, was 39,000 acres, as against 38,000 acres in the preceding year. Other dyes and tanning materials covered an aggregate area of 16,000 acres.

Drugs and narcotics

Drugs and narcotics occupied 2,188,000 acres in 1938-39, as against 2,171,000 acres in the preceding year. The actual increase or decrease under each kind is shown in the marginal table. There has been no significant variation in the

	1938-39	1937-38	Increase (+) or Decrease (-)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Opium	10	9	+1
Coffee	96	98	-2
Tea	737	739	-2
Tobacco	1,155	1,138	+17
Other drugs and narcotics	190	187	+3

acres under the crops included under this head.

Fodder crops

The head "Fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jowar, and carob or locust tree. The total area under fodder crops in 1938-39 was 10,371,000 acres, as against 10,411,000 acres in the preceding year.

Fruits and vegetables including root crops

The total area under fruits and vegetable crops in 1938-39 was 3,905,000 acres, as against 3,816,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see footnotes on page 113 and Appendix C].

Miscellaneous crops

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,240,000 acres. Of this 1,354,000 acres were occupied by miscellaneous food-crops and 886,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on page 113 and Appendix C.]

Area sown more than once

The total extent of land on which more than one crop was cultivated during the year was 34,184,000 acres, as against 33,370,000 acres in the preceding year.

The statistics recorded in Table V are based on cattle censuses. The census is taken annually in the Central Provinces and Berar and quinquennially in the other provinces. The first general quinquennial census was taken in 1919-20, the second in 1924-25, the third in 1929-30 and the fourth in 1934-35. Two provinces, Bengal and Bihar and Orissa, did not, however, take part in the 1934-35 census. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. The animals are divided into three classes, namely, (1) bovine, comprising oxen and buffaloes, (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys and camels. The total number of live-stock of each of these

Table V
Live-stock, ploughs
and carts

	Number in thousands				
	Bovine	Ovine	Others	Ploughs	Carts
Ajmer-Merwara . . .	481	515	14	50	17
Assam	5,982	795	20	1,145	63
Bengal*	25,287	6,449	116	4,592	860
Bihar and Orissa* . .	21,308	6,779	227	3,542	625
Bombay	9,981	3,790	100	1,214	678
Central Provinces and Berar†	12,786	1,635	135	1,670	1,084
Coorg	117	3	1	28	1
Delhi	155	36	15	18	8
Madras	24,807	18,700	201	4,384	1,194
North-West Frontier Province‡	1,088	906	169	204	7
Punjab	15,840	8,589	1,398	2,301	367
Sind	2,135	2,322	373	339	90
United Provinces . .	32,470	10,002	818	5,190	1,094

three classes in each province, together with the numbers of ploughs and carts, according to the fourth census in each province, is stated in the margin. Under the bovine class almost all the provinces which took part in the census of 1934-35 showed increases as compared with the preceding census. Madras recorded an increase of over two millions, the Punjab an increase of over one million and a half and the United Provinces an increase of over one million. In the case of stock of the ovine class, the United Provinces recorded the highest increase, viz., 1,208,000 heads and Madras the largest decrease, viz., 1,570,000 heads. Under ploughs, the United Provinces showed a noticeable increase of 143 thousand and Madras a noticeable decrease of 92 thousand. In the case of carts, the United Provinces showed a noticeable increase of 96 thousand and Madras a noticeable decrease of 41 thousand.

The table below shows the approximate number of live-stock of the bovine class (cattle proper), according to the fourth census in each province, per 100 acres of sown area and per 100 of the population in each province:—

Number of cattle			Number of cattle		
	Per 100 acres of sown area	Per 100 of population		Per 100 acres of sown area	Per 100 of population
Ajmer-Merwara	171	86	Coorg	92	84
Assam	90	69	Delhi	90	24
Bengal	102(d)	52	Madras (b)	78	57
Bihar and Orissa (a)	87	57	North-West Frontier Province	50	42
Bombay	35	59	Punjab	63	67
Central Provinces and Berar (c)	52	83	Sind	52	68
			United Provinces	90	67

The varieties of land tenure in the different provinces are included in Table VI and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; and when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure

Table VI
Land Revenue
Assessment

* Figures relate to 1920-30 census.

† Excludes North Waziristan and Kurram districts.

‡ Exclusive of portions of Raipur and Bilaspur districts transferred to the Orissa province.

§ As Orissa had not been constituted as a separate province at the time of holding the 1934-35 census, figures given relate to the provinces as they existed prior to 1st April, 1936. An estimate for Orissa has, however, been framed and shown in Table No. 70. Figures for the Central Provinces, however, relate to the province as reconstituted on 1st April, 1936. Figures for the reconstituted provinces of Bihar for 1929-30 and of Madras for 1934-36 may be obtained in the manner indicated in the footnotes on pages 208 and 224 respectively.

(a) Approximate.

(b) Represents the reconstituted province of Madras.

(c) " " " " " the Central Provinces and Berar.

(d) Based on 1929-30 live-stock census figures.

is known as *raiya-wari*. Under either system there may be rent-paying sub-tenants. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a limited number of years only. Village communities and *raiya-wari* tenures are, as a rule, temporarily settled, and the land revenue assessed on them is liable to change from time to time.

The following table shows the position as regards the forms of land tenure in the surveyed areas of the various provinces, according to the latest statistics available, the figures roughly indicating the extent to which the different systems prevail :—

	Raiyatwari	Zamindari (individual proprietors or village communities) settled		Total
		Permanently	Temporarily	
	Acres (1,000)	Acres (1,000)	Acres (1,000)	Acres (1,000)
Ajmer-Merwara	778	784	1,562
Assam	29,872	3,919	1,694	35,485
Bengal	39,158	10,100	49,258
Bihar	39,694	4,630	44,324
Bombay	44,676	...	3,977	48,653
Central Provinces and Berar	11,192	...	89,445	63,112*
Coorg	1,012	1,012
Delhi	369	369
Madras	58,515	21,246	...	70,761
North-West Frontier Province	8,579	8,579
Orissa	3,930 (a)	9,861	6,815	20,606
Punjab	60,173	60,176
Sind	30,180	30,189
United Provinces	7,306	60,660	67,966
Total	179,377	121,962	197,229	511,043*

It will thus be seen that 36 per cent of the total area (excluding Government forests in the Central Provinces and Berar, *vide* footnote * below) is held by *raiya-wari* proprietors, while 24 per cent is held by permanently settled and 40 per cent by temporarily settled *zamindari* proprietors.

The statistics for this table are collected annually in Assam, Ajmer-Merwara, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar, Orissa, the United Provinces, Bombay, Sind, Madras and Coorg. According to the latest statistics available, the total revenue from land (excluding cesses) for the whole of British India amounts to over R 34 crores. This represents the actual realisable demand on account of the year, no account being taken either of the collection of arrears for past years, or of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province †. For additional details, reference should be made to Table No. 74 on pages 244-251.

	Total revenue from land (Rs.1,000)	Total population (1,000) No.	Revenue per head R a.
Ajmer-Merwara	3.23	369	— 16
Assam	1,48.35	8,632	1 11
Bengal	3,18.64	48,989	— 10
Bihar	1,31.12	32,371	— 6
Bombay	3,75.38	16,716	2 4
Central Provinces and Berar	2,32.29	16,323	1 8
Coorg	1.53	163	2 12
Delhi	3.81	636	— 10
Madras	7,65.00	44,154	1 12
North-West Frontier Province	30.32	2,497	1 3
Orissa	53.06	8,015	— 11
Punjab	5,05.21	23,561	2 2
Sind	1,73.85	3,888	4 7
United Provinces	6,77.63	48,499	1 6
Total	34,22.63	253,739	1 6

* Including 12,475,000 acres of Government forests.

† Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

‡ Statistics of the incidence of land revenue assessment dealt with in this table show only the *average* amount contributed by each acre of land or per head of population in each province or district towards land revenue. They cannot be used for comparing the burden of land-revenue on land in the different districts and provinces as no valid comparison is possible without taking into account such factors as the nature of the soil, climate, facilities for irrigation, etc.

(a) Including Gountial and Malguzari.

Table VII shows prices of staple crops at harvest-time. The provincial figures represent median averages of the district figures reported in the provincial Season and Crop Reports. Table VII
Harvest prices

The Agricultural Department or the Land Records Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, of crops in each district. In order to test the accuracy of the standards of normal or average yield, and, if necessary, to revise them, a system of crop-cutting experiments exists in almost all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the provincial Agricultural Department or provincial Land Records Department. The results of the experiments are reported to the head of the provincial Agricultural Department, or Land Records Department, who revises the standards in the light of these returns, local enquiries and personal knowledge. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the figures as last revised with reference to the crop-cutting experiments and enquiries made up to 1936-37. Appendix A
Average yield of
crops

Appendices B and C require little or no comment. Appendix B explains the vernacular terms used in this volume, and Appendix C, the classification in Table IV of the various crops cultivated in India. Appendix B
Vernacular terms
Appendix C
Classification of crops

The map, charts, and diagrams exhibited in the volume illustrate—

- (1) the departure of sown area and that of rainfall in 1938-39 Charts from the average of the preceding ten years ;
- (2) variations in rainfall as compared with the normal in relation to the total area sown, food crops area, and current fallows (reversed) ;
- (3) total uncultivated area, net area sown and current fallows ;
- (4) total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops ;
- (5) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops ;
- (6) total area sown and area under different crops ;
- (7) total live-stock divided between bovine, ovine, and others ;
- (8) shares of provinces in the total area under principal crops and
- (9) harvest prices of certain principal crops.

A R SINHA,

Offg. Director of Statistics

Calcutta, July 11, 1915.

2. Total area sown, area under food crops, current fallows (reversed) and variations in rainfall as compared with normal.

NOTE.—(1) In the above chart figures of area represent million acres, while those for rainfall inches.

(2) The curves relating to "Current fallows" and "Rainfall" should be read with reference to scales shown on the left hand side.

3. Total uncultivated area, net area sown, and current fallows.

NOTE.—Total uncultivated area comprises area under forest, area not available for cultivation and other uncultivated land excluding current fallows.

4. Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops.

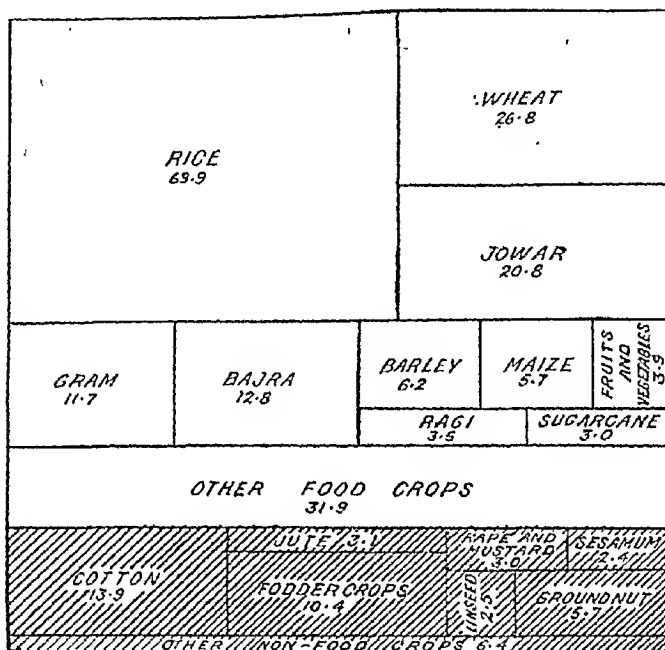

5. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

NOTE.—Millets represent jowar, bajra and ragi.

6. Total area sown in 1938-39.

Total area sown	243.6 million acres
Area under food crops (unshaded)	196.2 " "
Area under non-food crops (shaded)	47.4 " "

NOTE.—“ Other food crops ” are minor food-grains, condiments and spices and miscellaneous food crops.

“ Other non-food crops ” are oilseeds other than sesamum, linseed, rape and mustard and groundnut; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

7. Total Livestock divided between bovine, ovine and others in 1933-39 as compared with the year 1929-30.

1929-30
MILLIONS

1938-39
MILLIONS

NOTE (i)—“ Bovine ” includes bulls and bullocks, buffaloes, calves and buffalo calves.

“ Ovine ” includes sheep and goats.

“ Others ” includes horses and ponies, mules, donkeys, and camels.

(ii) The figures for 1938-39 include the 1929-30 census figures of Bengal and Bihar and Orissa and exclude those for the two Agency districts of the N.-W. Frontier Province.

8. Shares of provinces in the total area (in acres) under Principal Crops in 1938-39.

RICE
69.9WHEAT
26.8JOWAR
20.8BAJRA
12.8SUGARCANE
3.0TEA
738,000SESAMUM
2.4GROUNDNUT
5.7RAPE AND MUSTARD
3.0LINSEED
2.5COTTON
12.9JUTE
3.1

NOTE.—(i) In this diagram, the circles for the different crops have no relation to each other; they simply show the relative importance of each province in respect of each crop.

(ii) The share of the United Provinces in respect of sesamum, rape and mustard and linseed crops has been calculated on the basis of area under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop (vide the footnote on page v of introductory note).

9. Harvest Prices (Rs. per maund) of certain Principal Crops in India

* Prices for 1934-35 relate to the old province of Bihar and Orissa.
 † " " " " " " " " " " Madras.

TABLES

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY, 1919-20 TO 1938-39

Classification of area

[Thousand acres]

Land Revenue Assessment

[Thousand rupees]

	1919-20	1920-21	1921-22	1922-23	1923-24	1924-25	1925-26	1926-27	1927-28	1928-29
Total revenue from land excluding cesses	80,72,60	80,51,41	81,05,20	81,46,97	82,45,17	81,94,74	82,41,67	82,76,25	82,76,05	83,42,82

(a) Condiments and spices, fruits and vegetables, and miscellaneous food crops.

(b) The total of food crops and non-food crops shown here up to the year 1929-30 does not agree with the total sown area as the latter area includes certain areas in the United Provinces for which details are not available.

(c) Included under "Fruits and vegetables".

(d) Included under "Other oilseeds".

(e) Cinchona, Indian hemp, other dyes and tanning materials, other drugs and narcotics, and miscellaneous non-food crops.

* Includes 333,000 acres for which details are not available.

† Replaces the former head, "Culturable waste other than fallow".

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payment wholly realised during the year or not, is entered after excluding arrears for past years. Sums remitted on account of unoccupied lands, short provinces where remissions are not granted or are partially granted within the year, no deduction is made on account of remissions. This column revenue from canals in Sind, fluctuating collections (including nazrana), over-collections (Bombay), surplus collections, collections from Government Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor miscellaneous receipts, rents of railways class C. land, and rents of buildings situated on such lands.

Column 6.—The population is that of the last general census.

* Miscellaneous revenue.

† Excludes 5,555,438 acres in the districts of Bankura, Khulna, Murshidabad, Pabna and Ranpur for which details are not available.

‡ Excludes 2,286,334 acres for which details are not available.

§ Excludes 1,929,820 for two districts in the United Provinces for which details are not available.

(a) Incomplete.

(b) Represents Zamindari (permanently settled) and whole Inam village

available.

due by the zamindars to Government, not those due by riyats to the zamindars. The actual realisable demand on account of the year, whether crops, etc., are excluded in the case of those provinces where all remissions are granted within the year to which the return relates, but in includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are—(1) ordinary revenue, comprising fixed collections estates; (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (7) 12 per cent on collections from mineral products in forests and lands not under the management of the Forest Department, water mills rent, kucoba tax (Sind), *malikana* or 1804, petroleum well revenue, jade and amber revenue, recoveries in India of law charges in England on account of appeals from India, *Column 8*.—As in column 5, but only ordinary land revenue on fully assessed areas is entered.

(d) Defective owing to incomplete data.

(e) Includes 787,472 for one district in the United Provinces for which details by tenures are not available.

(f) See footnote 1 on page viii of the Introductory Note.

Note.—The figures for foreign countries have been taken from the monthly bulletins of International Crop Report and Agricultural Statistics, published by the International Institute of Agriculture, Rome.

* Including figures for Indian States, namely, 6,580,000 acres for rice, 6,370,000 acres for wheat, 811,000 acres for barley, 2,291,000 acres for maize, 6,028,000 acres for cotton, and 1,021,000 acres for linseed. The figures for rice, barley, maize and linseed for Indian States are, however, not complete, as returns for these crops are not furnished by a number of States.

(a) Not yet available. (b) Including sorghum. (c) Including Austria, Sudetenland and Memel.

(d) Including Austria and Sudetenland. (e) Including Ostmark and Sudetenland.

(f) Incomplete.

1936-37	48,721,608	48,721,608	48,721,608
1937-38	48,721,925	48,721,925	48,721,925
1938-39	48,720,910	48,720,910	48,720,910

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in the southern Provinces. The provincial areas in this column exclude Indian States in direct political relations with the Crown Representative, but include States politically controlled by the Provincial Governments, with the exception of the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of Indian States included in column 2.

Column 4.—Prior to 1938-39 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II, III and IV were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 4. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II.

* This figure is that of settlement as there is no record of area according to professional survey.

** Excludes area of Indian States which are now in direct political relationship with the Crown Representative.

† Figures for 1934-35 relate to "Bihar and Orissa".

‡ Figures for 1934-35 relate to Bombay and Sind.

(a) Decrease is due to retrocession of certain tracts to Mewar and Marwar States in Rajputana.

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (48,720,919 acres) entered in columns 5 and 6 for 1938-39 (page 22), 45,062,877 acres are based on actual returns and 3,658,042 acres on estimates.

1938-39 : : : : }					

Columns 2, 6 and 6.—For the unsurveyed areas of zamindari estates and waste land grants for which accurate statistics are not available, the figures are based on estimates. In the Central Provinces, the zamindars are landlords of high local standing and old family, whose estates, commonly large and compact, were originally held on quasi-feudal tenure, but who are now ordinary proprietors to whom certain concessions are allowed in consideration of their previous history.

Column 2 states the area as ascertained by the provincial Survey Department, supplemented, for tracts which have not come under the operations of that Department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain *raiyatwari* and whole *inam* villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts and the absence of a detailed survey. Of the total area (79,795,395 acres) entered in column 6 for 1938-39 (page 26), 77,037,358 acres are based on actual returns and 2,708,037 acres on estimates.

1938-39 : : : : :	30,179,066				

Column 2.—The revenue survey being incomplete, the exact area is not known; the column states the area of surveyed tract¹⁵ plus the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,179,066 acres), entered in columns 5 and 6 for 1938-39, 27,602,802 acres are based on actual returns and 2,576,264 acres on estimates.

NOTE.—The variations in the areas shown in different years under the same item in the same province do not necessarily represent an actual increase or decrease on the area in question. In many cases, a revised classification or the correction of a faulty estimate is responsible for the change.

Column 2.—"Forests" mean "any land classed or administered as forests" under any legal enactment dealing with forest. Any cultivated areas existing within such forests may be excluded and entered in column 6 (not area sown). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the Forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, local boards, municipalities, etc., and (3) because, on the other hand, certain village and other lands not covered by forest but worked and returned as forests by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the sown area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

* See footnote † on page 14. ** Replaces the former head, "Culturable waste other than fallow." † See footnote ‡ on page 14. ‡ See footnote (a) on page 15. § Figures given in this column represent areas definitely known to be culturable.

See explanations given in the footnotes (page 35).

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the Forest Administration Report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

(b) Includes unculturable Government waste and unculturable lands.

(c) States the estimated area of culturable Government waste.

(d) Shows (1) the estimated area of culturable Government waste, and (2) the difference between the net area sown and the gross area of the actual holdings (exclusive of waste). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

* See footnote (b) on page 15. † See footnote * on page 15. ‡ See footnote ‡ on page 15. § See footnote ** on page 35.

Figures given in this column represent areas definitely known to be culturable.

Column 2.—The figures represent reserved forests, but exclude the areas of forest villages within the reserves which are entered under the appropriate heads of this table.

Columns 3 and 4.—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5.—Includes generally all lands which are thrown out of cultivation or not cultivated for three years. Figures for the hill districts (except the plains portion of the Garo Hills) and Sadiya and Balipara Frontier Tracts are rough estimates.

Column 6.—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts and the Sadiya and Balipara Frontier Tracts are based on estimates.

(a) The figures relate to the plains portion only.

(b) Figures given in this column represent areas definitely known to be culturable.

(c) footnote** on page 35.

Column 2.—The figures represent Government forests and estimates of other forest areas furnished by District Officers.

(a) Excludes the Bakarganj Sundarbans, "protected forests"

(b) Figures given in this column represent areas definitely known to be culturable.

(c) See footnote ** on page 35.

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2 includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3 includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

*Figures given in this column represent areas definitely known to be culturable. † See footnote ** on page 36.

Column 2 shows the area administered by the Forest Department, plus the areas in the Chhattisgarh and Chanda zamindaris which are outside the boundaries of surveyed villages. These latter areas are almost wholly under high forest and include only a negligible proportion of sparse and shifting cultivation. In Berar, the forest area includes that administered by the Forest Department but excludes a large area of cultivated land in the Melghat taluk in Amraoti district shown as forest in the forest report.

Column 3 states areas covered with water, hill or rock and land occupied by buildings and roads. For Berar, it includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub, jungle or grass, and (4) groves not included in holdings. For Berar, it includes land available for cultivation but not given out.

Column 5.—Land which has been fallow for not more than three years is reckoned as "Current fallows". For Berar, it includes occupied culturable land left fallow for private reasons such as grazing, rotation, etc.

*Figures given in this column represent areas definitely known to be culturable. † See footnote * on page 35.

Column 2 includes the area cultivated within forests. The area cultivated with coffee, tea, and rubber within forests is, however, excluded from this column and is shown under column 6.

Column 4 includes areas occupied by babul and casuarina trees when they do not form parts of forest areas.

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

* Figures given in this column represent areas definitely known to be culturable. † See footnote * on page 35.

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

* Figures given in this column represent areas definitely known to be culturable.

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,800 acres of mountain tracts in Simla, and 8,896,860 acres of mountain tracts in Kangra (mostly forest areas). These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years, but as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

* Figures given in this column represent areas definitely known to be cultivable.

<i>Total</i>							
1937-38	717,671	13,548,576	5,899,512	4,873,248	5,149,479	30,179,486	...
1938-39	760,469	13,708,864	5,605,634	6,005,638	6,108,271	30,179,966	...

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2.—The figures in Sind do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Column 3 includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net sown area (5,108,271 acres) in Sind included in this column for 1938-39, 5,003,352 acres are based on actual returns and 44,919 acres on estimates.

*Figures given in this column represent areas definitely known to be culturable.

† See footnote 2 on page 35.

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7) is thus due to the inclusion in column 19 of the area irrigated at both harvests.

1938-39

Column 4.—The term "Tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

* Statistics of irrigation are not collected.

NOTE.—The figures are only estimates except in the case of areas irrigated from Government canals. In the case of Ganjam and Koraput districts, the term "Tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

See explanation given in the footnote (page 100).

*The excess of the total area irrigated over the total area of crops irrigated is due to the inclusion in col. 7 of last year's figures in respect of one tahsil in the district which was under land record operations.

Column 30 (other dyes and tanning materials).—Arnotto, chayroot, divi-divi, henna, madder, morinda, saffron.

Column 33.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on "Indian Tea Statistics" published separately. The principal reason is that the special report is prepared from returns received from mandgirs and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 37 (other drugs and narcotics).—Aloes, areca nut, ajwain or bishop's weed, sweet basil, betel-vine, country borage, bogoda brinjol or nala mulaka, dhatura, purple flea-bane, isfagul, kolingi or vampali, senna, sweet flag.

* See footnote † on page 14. ‡ See footnote (a) on page 15.

† " " ‡ " " 14. § " " (a) " "

(a) Decrease due to exclusion of "Safflower seed" transferred to "Oilseeds—Others".

NOTE.—The areas of crops except cotton and tea are collected by the Land Records staff for the temporarily settled plains revised quinquennially by the district officers except in case of forest crops for which estimates have to be made annually. In the crops except cotton and tea the areas are estimated in Sylhet by the Deputy Commissioner on the basis of the population figures; statistics in all districts are supplied by the tea-garden managers and proprietors. The areas of cotton are obtained in Cachar in Sylhet information is obtained from the Collector of *dao-tax*, in the Garo Hills from hill *mauzadars*, in Nowgong from the *doms* and *sirdars*, and in the Naga and Lushai Hills from intelligent chiefs.

* Included under 'Other food grains, including pulses'.

NOTE.—For the greater part of the province the figures are estimates framed by the district officers on information obtained through the agency of the police and from the revenue staff of the local landlords. Where available, the figures collected during the cadastral survey serve as a check on the estimates framed.
